

LANE SEPARATORS

REDUCING SPEED, GENTLY AND EFFECTIVELY

The new Rosehill Lane Separator range consists of a trio of versatile rubber products for the separation of vehicles and bicycles. The surface fixed units require no excavation and simply glue and bolt to form a solid and secure attachment into all suitable surfaces. All three unit types are the same length, width and height, facilitating diverse configuration possibilities.

Applications Include:

- Cycle lane separation
- Traffic lane separation
- Car parking barrier plinths
- Satellite islands
- Build-out systems
- and more...

Lane Separators

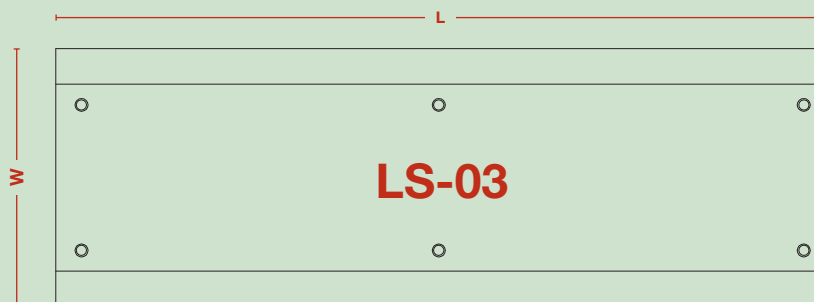

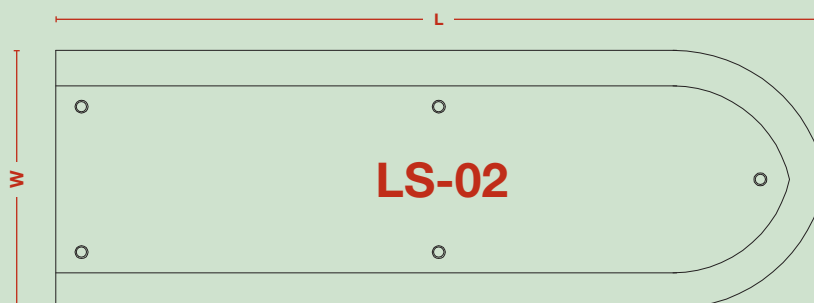

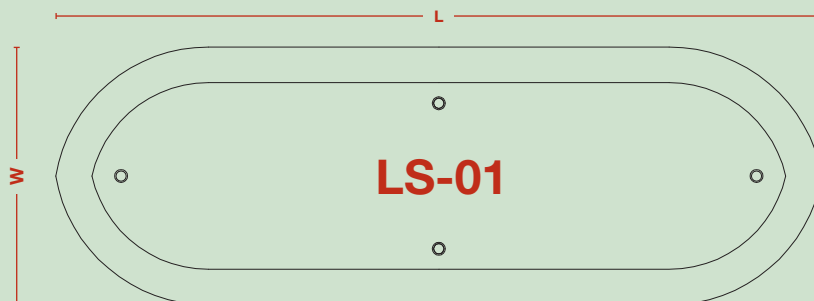

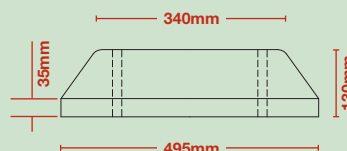

Permanent or temporary - the Rosehill Lane Separator range offers tremendous versatility and cost saving benefits over cast in-situ and modular alternatives.

Weight (kg)	Colour	Height (mm)	Dimensions (m)	Product Code
Lane Separator				
95	Grey	130	L: 1.5 W: 0.5	LS-01
100	Grey	130	L: 1.5 W: 0.5	LS-02
