

SPEED CUSHIONS

REDUCING SPEED, GENTLY AND EFFECTIVELY

The rubber 1 and 2 piece speed cushions are manufactured from recycled tyre rubber. Tough and flexible, they follow the road surface contour and incorporate a unique underside profile that moulds itself to the road surface without the need for excavation. Installation can be completed in less than one hour resulting in minimal road disruption and significantly reduced installation costs.

- The only 1 piece rubber speed cushion manufactured in the UK
- Surface fixed, no need for excavation
- Colours: black or red as standard
- Low maintenance - impact resistant, retains form
- Can be customised with logos, speed indicators and high visibility traffic direction markings, all moulded into the products
- Includes fitting kit: anchors, resin and drill bit, complete with installation instructions
- Conforms to DfT and UK Council specifications

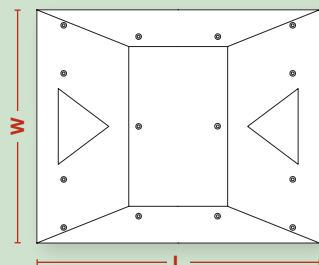

“Quick and easy to install they serve their purpose by retaining form. The ideal solution for the replacement of failing bitmac speed cushions.”
